PROJECTS

Netflix-GPT

github.com/NetfliX-GPT/repo

- Netflix-GPT is a React.js-based app with AI-powered features for personalized movie and TV show browsing. It uses Firebase for secure user authentication and data storage and integrates the Movie Database (TMDB) API for real-time movie and show details. Powered by Firebase Hosting, it offers fast and reliable performance.
- Tools used: React.js, Fire-base, CSS, TMDB API

Foodify-(Food Ordering app)

github.com/Foodify-/repo

- The Food Ordering App is a modern application built using React.js and styled with Tailwind CSS. The app features restaurant cards that display essential details. Users can browse detailed restaurant menus, add items to their cart, and view real-time updates. It includes on-line/off-line detection functionality, displaying a shimmer loading effect during offline mode. Powered by the Swiggy API, the app fetches real-world restaurant and menu data, ensuring dynamic and realistic back-end support.
- Tools used: React.js, Tailwind CSS, Swiggy API
